DONATE TO PM CARES FUND VIA PAYTM (UPI)

PROCEED

Narendra Modi 
@narendramodi

The PM-CARES Fund accepts micro-donations too. It will strengthen disaster management capacities and encourage research on protecting citizens.

Let us leave no stone unturned to make India healthier and more prosperous for our future generations.

Pledge:

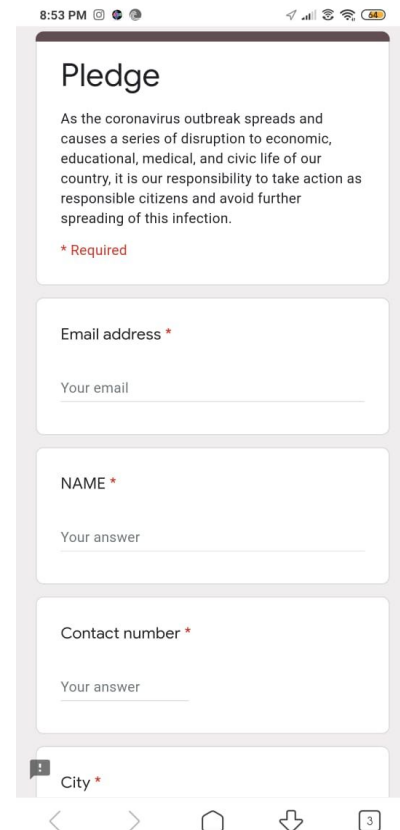

Users , who take a pledge to abide by the rules that prevent the disease spreading further are awarded a certificate. The generated certificate will be sent through mail.

In this day and age, it is in all of our hands, literally and figuratively, on how and when do we wish to end this pandemic. If all of us come together and take a pledge to take all the necessary precautions that are necessary to save our near and dear ones, then this problem can definitely be ended soon!

I PLEDGE...

(We will generate you an E-certificate)

A screenshot of a mobile app interface showing a "Pledge" form. The form has a title "Pledge" and a paragraph of text: "As the coronavirus outbreak spreads and causes a series of disruption to economic, educational, medical, and civic life of our country, it is our responsibility to take action as responsible citizens and avoid further spreading of this infection." Below the text, there is a red asterisk and the word "Required". The form contains four input fields: "Email address *", "NAME *", "Contact number *", and "City *". Each field has a placeholder text "Your email" or "Your answer". At the bottom of the form, there is a navigation bar with icons for back, forward, home, and a tab labeled "3".

4. Web App :

A webapp has also been created. And is hosted currently at the link <https://www.dotquestionmark.com>

The WebApp provides the following functionalities:

LIVE STATUS COVID-19:

A list of:

1. Total Cases in India
2. State wise cases.
3. Total deaths till date

[HELPLINE](#) [FAQ](#) [PRECAUTIONS](#) [SYMPTOMS](#) [NEARBY](#) [DONATE](#)

FREQUENTLY ASKED QUESTIONS (FAQ)

Coronavirus disease 2019 (COVID-19) is a respiratory disease that can spread from one person to the other. There are many types of human coronaviruses, including some that commonly cause mild upper-respiratory tract illnesses. COVID-19 is a new disease, caused by a novel (or new) coronavirus that has not previously been seen in humans. Symptoms that are currently reported by the patients suffering from COVID-19 have reported mild to severe respiratory illness, along with fever, cough, and difficulty in breathing.

WHAT IS A NOVEL CORONAVIRUS

A novel coronavirus is a new coronavirus that has not been previously identified. This virus causing coronavirus disease 2019 (COVID-19), is not the same as the previously identified coronaviruses, which commonly circulated among humans and caused common cold and mild fever.

DOES COVID-19 PRESENT A RISK TO THE SAFETY OF THE NATION'S BLOOD SUPPLY

Since respiratory viruses are not transmitted through blood transfusion, and no such cases of transfusion-transmitted coronavirus have been reported so far, it does not present a risk to the safety of Nation's blood

ARE ANTIBIOTICS EFFECTIVE IN PREVENTING OR TREATING COVID-19

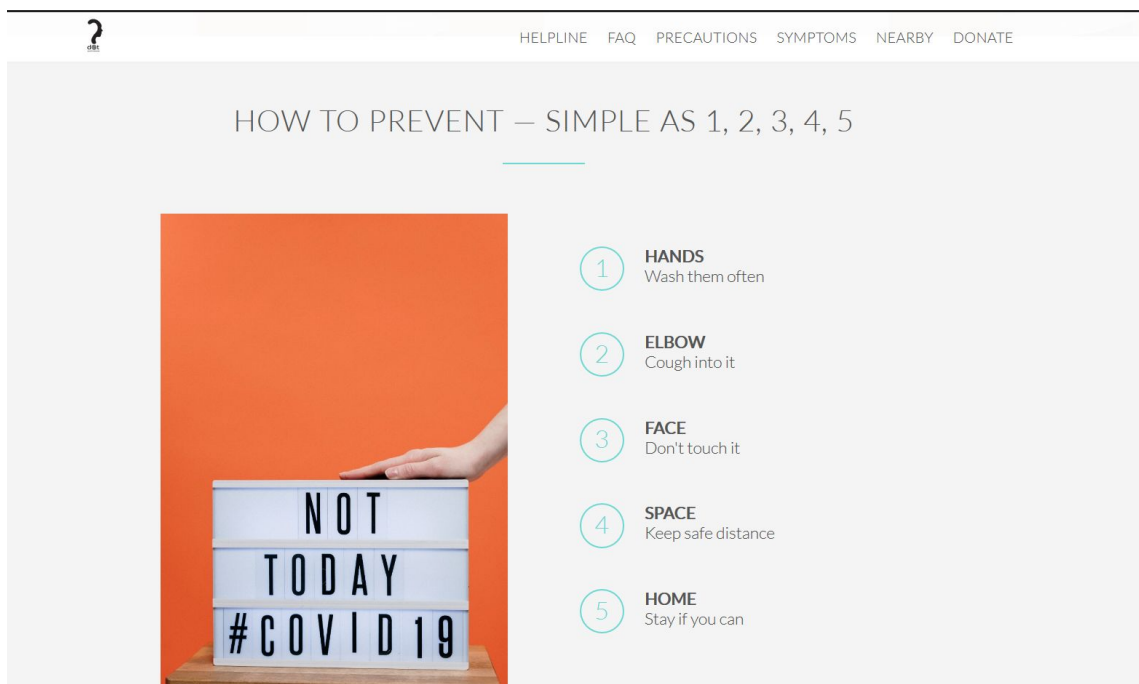

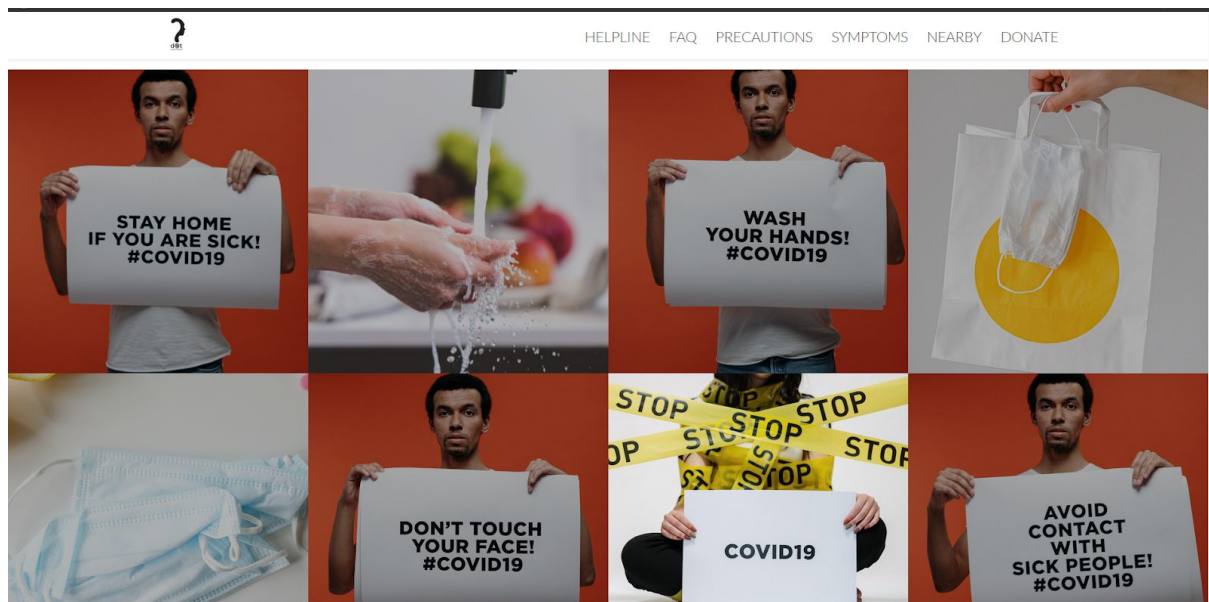

No. Antibiotics are not effective against viruses. This is because, antibiotics work on bacterial infections only. Since COVID-19 is caused by a virus, antibiotics will not be useful.

CAN SARS-COV-2, THE VIRUS THAT CAUSES COVID-19, BE TRANSMITTED BY BLOOD TRANSFUSION

In general, respiratory viruses are not known to be transmitted by blood transfusion, and there have been no reported cases of transfusion-transmitted coronavirus.

PRECAUTIONS:

Various precautions that people should take in such a situation have been listed. These precautions will not only help people to stay safe, but will also help in keeping everyone around them safe.

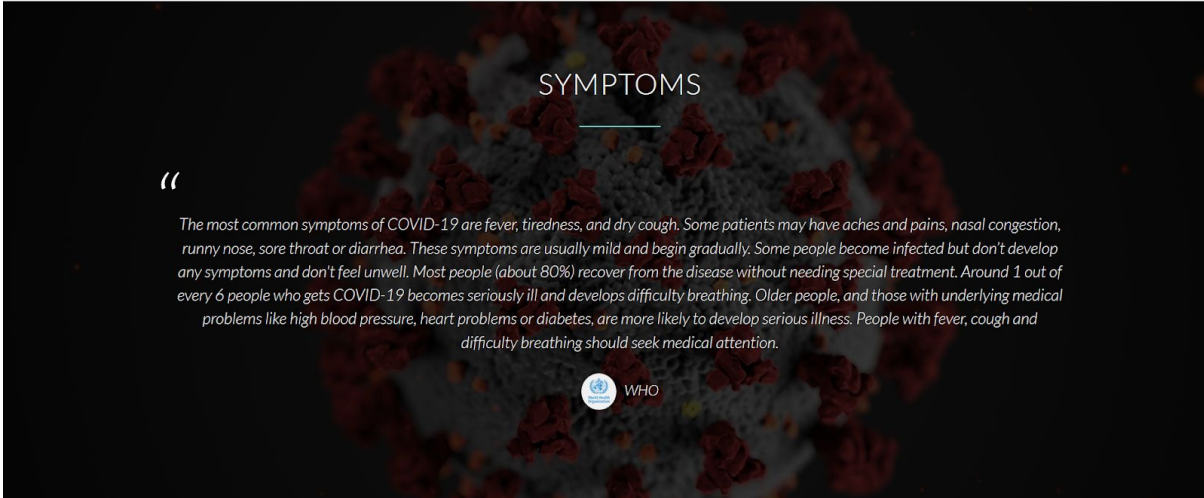

HOW TO PREVENT – SIMPLE AS 1, 2, 3, 4, 5

- 1 HANDS**
Wash them often
- 2 ELBOW**
Cough into it
- 3 FACE**
Don't touch it
- 4 SPACE**
Keep safe distance
- 5 HOME**
Stay if you can

SYMPTOMS:

Symptoms for the disease have been mentioned, along with the people who are in a greater risk than others. These people basically include the old people, children and those who have low immunity. The stated symptoms are provided by WHO itself.

[HELPLINE](#) [FAQ](#) [PRECAUTIONS](#) [SYMPTOMS](#) [NEARBY](#) [DONATE](#)

SYMPTOMS

“

The most common symptoms of COVID-19 are fever, tiredness, and dry cough. Some patients may have aches and pains, nasal congestion, runny nose, sore throat or diarrhea. These symptoms are usually mild and begin gradually. Some people become infected but don't develop any symptoms and don't feel unwell. Most people (about 80%) recover from the disease without needing special treatment. Around 1 out of every 6 people who gets COVID-19 becomes seriously ill and develops difficulty breathing. Older people, and those with underlying medical problems like high blood pressure, heart problems or diabetes, are more likely to develop serious illness. People with fever, cough and difficulty breathing should seek medical attention.
